DETAILED ACTION

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claim 4 is rejected under 35 U.S.C. 102(b) as being anticipated by 3,817,648 to Miller. Miller discloses a core bit having a cylindrical drilling portion (12) and boring blade (14) formed at one end side of the drilling portion and a mounting portion (fig 5, upper portion of the shaft that is mounted in the chuck) formed at the other end side of the drill portion. Miller discloses having a guide portion (92) in a cylindrical shape and a ring like seal (90) between the guide and a side of a chuck portion, wherein the ring shaped seal comprises an O-ring contained in the ring shaped groove formed at an outer peripheral face of the guide portion (fig 1).

Claim 5 is rejected under 35 U.S.C. 102(b) as being anticipated by Re.26,623 to Erikson. Erikson discloses a drill (16) having a cylindrical shape, a boring blade (M) formed at one end side of the drilling portion, a mounting portion formed at the other end side of the drilling portion (figure 1, portion of the tool that is inserted in the chuck is considered the mounting portion) and including a guide portion (40) in a cylindrical shape, a ring shaped seal member (42') provided at the guide portion for forming a seal between the guide portion and a side of a chuck portion of the drill, the ring shaped seal

member comprises an O-ring (42') contained in a ring shaped groove formed at an end face of the guide portion (O-ring 42' is contained in a ring shaped grooved formed in the end face of head 42 which is part of guide portion 40).

Allowable Subject Matter

Claims 2,3,6 are allowed over the prior art of record. None of the cited references disclose a ring-shaped seal member in the configurations recited in these claims.

Response to Arguments

Applicant's arguments with respect to the claims have been considered but are moot in view of the new ground(s) of rejection.

Conclusion

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. This is simply art of interest and not used to reject any claims in this office action.
